WHEAT EXPORT FALLS CONSID-ERABLY BELOW LAST YEAR.

Weekly Review of Trade tomorrow will say:

Aside from heavy rains in Texas the week's crop news is encouraging. Manufacturing plants are well occupied as a rule, iron and steel leading, followed by fextiles and footwear. Fuel scarcity is still causing delay, although coke ovens are surpassing all previous figures of output and bituminous mines are vigorously operated. At most points retail trade is active and preparations continue for heavy fall sales, while spring lines are opened with good results. Railway earnings thus far available for July show a gain of 3.3 over 1901 and 20.8 per cent over 1900.

gain of 3.3 over 1991 and 29.8 per cent over 1990.

With business in sight for at least a year, the leading departments of the iron and steel industry may properly be considered prosperous.

Hides have made further sensational advances, Colorado steers reaching new high record prices.

Grain prices declined sharply as the month of speculative manipulation drew to a close and legitimate trading resumed a more normal volume.

Meats have shown a tendency to seek slightly lower quotations, but light receipts and higher quality do not promise any extensive relief in the immediate future.
